

Triple power relay board

A117

The triple power relay board from Löhnert Elektronik is designed for the connection of power paths in measurement technology.

Technical data:

- Triple power relay for 2 change-over contacts each Type C with freewheeling diodes
- Euroboard with VG64 multipoint connector
- Switch contact: 250VAC, 30VDC, 5A, 1250VA, 150W
- Control: 12 ... 24V, 0.5mA
- Power supply: 24V/100mA
